

Swedish LOAD Becomes Raz-Lee Security Partner

Nanuet, New York – April 27, 2016 – [LOAD in Sweden](#) and [Raz-Lee Security](#), today announced a partnership whereby LOAD will provide IBM i security, auditing and compliance services to its Swedish customers based upon Raz-Lee's iSecurity suite of more than 20 solutions.

Raz-Lee's iSecurity software suite has been designed specifically for the IBM i (AS/400) environment. The product suite includes infrastructure security solutions which protect network access; monitor and report on system activities; manage user profiles and authorities track software changes. Its application security solutions audit database activity, provide real-time alerts when critical business data changes and enable Business Intelligence analysis of application data changes amongst other functions.

iSecurity has full multi-LPAR management capabilities and operates in both green screen and full GUI modes; all products can send real-time alerts to SIEM & DAM solutions such as Imperva, McAfee, IBM QRadar, HP ArcSight, RSA Envision, Splunk, Juniper, GFI, NNT and others.

The Swedish-based IT company, LOAD, caters to companies and organizations in which IT is the backbone of the business; the majority of LOAD's customers are using the IBM Power i platform for their most critical IT systems. By partnering with Raz Lee, LOAD is aiming for strengthening its core offering in high availability. LOAD will also be among the first of Raz-Lee's partners to offer iSecurity products and solutions as a service.

Christer Hermansson, Chief Consultant at LOAD said: "We are delighted to be part of Raz-Lee's partner program. Their suite of IBM i security products are industry-leading and the partnership further strengthens our core business offering around IBM i services to leading Swedish companies whose IT is based on the IBM i platform. These solutions are especially important considering the increasing more stringent IT security regulations, internal threats to business-critical data, cyber-attacks and hackers, etc."

Eli Spitz, VP of Business Development at Raz-Lee Security said: "Raz-Lee, which has been active for many years in the Swedish market, is proud to partner with Load Cloud Services AB for our iSecurity suite; the partnership with Load will further enhance our position with leading IBM i (AS/400) based companies in Sweden in the areas of security, auditing and compliance solutions".

About Load Cloud Services AB

Based in Sweden, LOAD is a trusted advisor and partner to companies and organizations where the consequences of downtime and data loss can be devastating. IT is business-critical to LOAD's customers and LOAD's main focus to ensure storage, backup, restore and security through tailored services in infrastructure and support.
