

Raz-Lee's FileScope File Editor: New Release with Major Improvements!

Nanuet, New York – January 5, 2017 - Raz-Lee Security Inc., a major vendor of security, auditing & compliance software solutions for IBM i systems as well as the developer of the highly-acclaimed FileScope File Editor, is announcing a new release of FileScope which answers to requests from numerous long-term FileScope users worldwide.

Unlike other products, FileScope provides an intuitive high level interface with capabilities and features which have been proven to increase productivity for business analysts, team leaders and of course, for programmers.

The features incorporated into FileScope Release 18.0 cover a wide variety of areas:

1. E-Mail the current view of the file or the original file:
 - a. Data can be in sent as *CSV, *XML, *TXT, *DAT or *SAVF files
 - b. Supports Zip and Password protection
2. FTP related features:
 - a. FTP can send data in *SAVF, *FILE, *CSV
 - b. Data can be sent in EBCIDIC or ACSII as per the recipient.
3. Single Record Alternative Views: To enhance productivity, the screen can now be displayed in 3 alternative modes:
 - a. Text, Data, Attributes
 - b. Right justified text, Data, Attributes
 - c. Attributes, Data, Text (the mode supported by previous releases)
4. Subset- Support for Case Sensitive comparisons
5. Subset- Support of New Testing N/RANGE (Not/In Range), N/VALUE (Not/In the Values), N/LIKE (Not/Like)
6. New System Configuration Aids:
 - a. Recommended product definition values have been added
 - b. Enhanced E-mail is provide
7. Improved support of industry standards terminology

FileScope, the first file editor in the IBM i (AS/400) market, was originally released in 1983 and has been used over the years by many thousands of programmers in companies worldwide. FileScope is constantly being developed and maintained.

Thanks to FileScope's ease of use and intuitive implementation, it continues to be highly acclaimed by companies in all industries and in particular in the financial, healthcare and industrial markets.

“Throughout the years since FileScope was first released, it has been acclaimed as the best File Editor for IBM i (AS/400) systems. Programmers worldwide depend on FileScope’s friendly user-interface, ease of use and powerful functionalities” said Shmuel Zailer, CEO at Raz-Lee Security.

“The latest set of features incorporated into FileScope in response to user’s requests, raise FileScope’s value as a catalyst for solidifying the IBM i’s position at companies in all industries”.
