

Raz-Lee Security Included in Gartner's 2015 Market Guide for Privileged Access Management

Nanuet, New York – October 15, 2015 - Raz-Lee Security Inc., a major vendor of security, auditing and compliance software solutions for IBM i systems, announces that it has been included as a representative vendor in Gartner's 2015 Market Guide for Privileged Access Managed Report for its [iSecurity suite of solutions](#) .

Gartner, Inc., an information technology research and advisory firm based in Connecticut, recently published its 2015 Market Guide for Privileged Access Management. This guide includes information on data security vendors and compares services offered by data security companies around the world.

The guide lists four possible product categories under Privileged Access Management (PAM) that a company can be classified under:

Shared Account Password Management (SAPM)

Privileged Session Management (PSM)

Superuser Privilege Management (SUPM)

Application-to-Application Password Management (AAPM)

To quote from the report:

"Raz-Lee Security (www.raz-lee.com) provides the iSecurity software suite, a security, auditing and compliance solution of 20 tools for IBM i. Several of these tools fall into the category of PAM. The audit tool reports the security status and activity based on the system journal (QAUDJRN). The Action tool can trigger automated alerts. Authority on Demand is used to provide user authorities on an as-needed basis."

"We believe that Raz-Lee's favorable mention as a representative vendor in Gartner's 2015 Market Guide for Privileged Access Managed Report for its [iSecurity suite of solutions](#) emphasizes our commitment to providing the leading IBM i security, auditing and compliance solutions as requested by our customers worldwide." said Eli Spitz, VP of Business Development at Raz-Lee Security.

Gartner, Market Guide for Privileged Access Management, Felix Gaehtgens, Anmol Singh, 27 May 2015
