

Raz-Lee to Speak about Data Security Implementation at IBM Event "Security & Power: A Winning Team" in Milan

Herzliya, Israel – September 3, 2009 – Raz-Lee Security, a leading supplier of information security solutions for IBM Power i computers, will be giving two presentations at the IBM Event "Sicurezza & Power: un team vincente" at the IBM Forum in Milan. The event will take place on September 8th, and will illustrate the synergy between Security and IBM Power i.

Hosting 350 participants, the event will include lectures by security experts and demonstrations of security solutions, including Raz-Lee's iSecurity solution. Recent Italian legislation pertaining to data security will also be discussed, and guidelines for meeting the requirements will be presented.

Raz-Lee experts Nicola Fusco and Elvio Cappelli, and independent expert Adriano Berneri will give presentations, one providing an overview of data security, and the other discussing how Raz-Lee's Power i Security Solution, iSecurity, meets the data security requirements of the Italian market and legislation.

This event follows an ongoing Raz-Lee venture of 30 free Round Table meetings covering the requirements of the new Italian security legislation and how to best implement them on Power i. The round table meetings were conducted across Italy and were attended by IT staff as well as top management of Italian companies.

"We have accumulated considerable experience in educating Italian enterprises about Power i Security," said Nicola Fusco, Regional Manager, South Europe at Raz-Lee Security. "As a company that has focused on IBM Power i/AS/400 for the past 25 years, we are glad to share our breadth of knowledge on security for this unique platform."

About Raz-Lee Security Inc. and iSecurity

Raz-Lee Security, headquartered in Nanuet, New York, is the leading security solution provider for IBM's System i (AS/400) computers. Drawing upon its 25 years of expertise in the System i Performance and Optimization market, the company designs, develops and markets a comprehensive suite of advanced security software solutions - iSecurity.

Raz-Lee's iSecurity product suite is field-proven and has been successfully implemented in over 30 countries. iSecurity features three product sets: the Prevention pack, a complete security solution covering user/password management, anti-virus protection, detection of harmful events, protection of workstations and more; the Compliance pack, which comprises auditing and compliance solutions, providing automatic reporting security related information; and the Application Security suite,

which provides information on all changes in business-critical data using real-time alerts and timeline reports.
