

## Raz-Lee to Participate in the 11<sup>th</sup> Information Security Conference in Israel

**Herzliya, Israel** – March 9, 2010 – [Raz-Lee Security](#), a leading supplier of information security solutions for IBM Power i computers, will be participating in the [11th Information Security Conference](#), to be held on March 17<sup>th</sup>, in Petach Tikva, Israel.

The conference will be attended by CEOs, IT Security managers and experts, IT Managers, Industrial companies' managers, business development managers and others. A multitude of lectures will be offered by top experts from IBM, Juniper Networks, Bezeq Telecommunications and NetApp, as well as by the President of the Israeli IT Security and Auditing Association. In addition, a panel will be held on the subject of the Revolution in IT Security Regulation.

At the conference, Raz-Lee will showcase [nuBridges Protect](#), a state-of-the-art encryption and tokenization solution distributed in Israel. nuBridges Protect secures sensitive data at rest in database fields, files, applications and associated backup storage, to help companies comply with mandates like the [Payment Card Industry's Data Security Standard \(PCI-DSS\)](#) and government privacy acts.

This conference is Raz-Lee's second local event this quarter, following the IT GRC (Government, Risk Management & Compliance) annual event in Tel Aviv on February 18th.

"Raz-Lee is highly active and well-established in Israel, boasting prominent customers, including the largest banks and health funds in the country," said Eli Spitz, VP Business Development, Raz-Lee Security. "Our nuBridges Protect solution is the only solution in Israel combining both encryption & tokenization, and there is ever-growing interest in the solution among the leading enterprises in Israel."
