

Raz-Lee Security to Provide Imperva with Power i Security Technology for Imperva's SecureSphere Agent for DB2/400

Herzliya, Israel – February 8, 2010 - Raz-Lee Security (www.razlee.com), a leading supplier of information security solutions for IBM Power i (AS/400) Servers, announced a partnership to provide technology for Imperva's [SecureSphere Agent for DB2/400](http://www.imperva.com) (www.imperva.com), to be available in March 2010.

Imperva's proven excellence in cross-platform analysis and reporting of database activity is unequalled in today's market. These capabilities, together with Raz-Lee's long-standing Power i security expertise, enable SecureSphere customers to enjoy seamless integration of Power i database security with similar functionalities on other platforms.

[Raz-Lee's technology embedded in SecureSphere Agent for DB2/400](#) enables SecureSphere to monitor all database activities, including Insert, Update, Delete and Read access to sensitive business data. This is achieved by tracking information sources such as the Power i audit journal (QAUDJRN), database journals or ODBC network requests.

"A large number of our customers and prospects expect Power i support. Raz Lee provided the most robust and compelling platform support to the demands of Power i customers," said Limor Elbaz, Vice President Corporate Development at Imperva.

"The choice of iSecurity by Imperva highlights Raz-Lee's prominent market position in the area of Power i Application Security," said Shmuel Zailer, CEO, Raz-Lee Security. "As the leading Power i security experts, we were able to provide Imperva with a complete and comprehensive audit trail of Power i database activities and all related information. In addition to SecureSphere Agent for DB2/400 specific capabilities, Raz-Lee offers customers worldwide comprehensive Power i specific solutions for all security and compliance-related aspects of the Power i."

IBM Power i systems and databases are installed at hundreds of thousands of installations worldwide.

About Imperva

Imperva, the Data Security leader, enables a complete security lifecycle for business databases and the applications that use them. Over 4,500 of the world's leading enterprises, government organizations, and managed service providers rely on Imperva to prevent sensitive data theft, protect against data breaches, secure applications, and ensure data confidentiality. The award-winning Imperva SecureSphere is the only solution that delivers full activity monitoring from the database to the accountable application user and is recognized for its overall ease of management and deployment.
