

Raz-Lee to Participate in IBM Server Systems Technical Conference in Germany Featuring Power i Innovations

Herzliya, Israel – September 16, 2009 – [Raz-Lee Security](#), a leading supplier of information security solutions for IBM Power i computers, will be participating in the [IBM server Systems Technical Conference](#), October 19-23 in Mannheim, Germany.

The conference will offer a compelling agenda that includes more than 300 knowledge-packed technical sessions and hands-on training delivered by top IBM developers and experts. It's designed to provide clients and Business Partners with the most up-to-date information on recent IBM Systems announcements and technologies .

In the conference, IBM executives, developers and industry experts will reveal the latest innovations, trends and directions relating to IBM Power i, System x, BladeCenter and Storage Systems.

This conference is intended for IBM clients, IBM Business Partners, Independent Software Vendors and System Integrators, and is aimed primarily at technical specialists who perform an implementation role.

"As an [IBM Advanced Business Partner](#), and as leading Power i Security experts, we are committed to staying on top of IBM technology and security technology in general – which makes such conferences a must for us," said Eli Spitz, VP Business Development, Raz-Lee Security. "Of course, we will use this opportunity for strengthening our ties with IBM, current and future business partners, and our worldwide customers".

About Raz-Lee Security Inc. and iSecurity

Raz-Lee Security, headquartered in Nanuet, New York, is the leading security solution provider for IBM's System i (AS/400) computers. Drawing upon its 25 years of expertise in the System i Performance and Optimization market, the company designs, develops and markets a comprehensive suite of advanced security software solutions - iSecurity.

Raz-Lee's iSecurity product suite is field-proven and has been successfully implemented in over 30 countries. iSecurity features three product sets: the Prevention pack, a complete security solution covering user/password management, anti-virus protection, detection of harmful events, protection of workstations and more; the Compliance pack, which comprises auditing and compliance solutions, providing automatic reporting security related information; and the Application Security suite, which provides information on all changes in business-critical data using real-time alerts and timeline reports.
