

Raz-Lee Security Releases Compliance Evaluator, Enabling Quick & Easy Compliance Checks for System i

Nanuet, New York (24 February, 2009) - Raz-Lee Security Inc., a major vendor of security solutions for IBM System i computers, has announced its unique new Compliance Evaluator solution which enables managers to quickly check the compliance of their systems with industry and corporate policies based on customizable user-friendly reports. Compliance Evaluator is part of the iSecurity suite of System i Security solutions.

Compliance Evaluator provides managers with at-a-glance company-wide information covering up to 99 System i LPARs (Logical Partitions). It provides concise one-page reports featuring an overall compliance score, as well as specific ratings for any security-related component of System i, such as system values, network attributes and user profiles. Moreover, all the information is presented in easy-to-use Excel format.

With Compliance Evaluator, managers, system administrators and auditors can easily produce any number of advanced reports, choose the parameters and structure of the report and give different weights to each parameter. Each report can automatically be e-mailed to the relevant auditor.

Compliance Evaluator features include:

- Overall site compliance as well as individual system compliance scores
- Security baseline values can be set by the site for each individual system
- Breakdown of detailed and summary data into security areas
- Comparison of several systems at a single glance
- Reports on all events from the security audit journal (QAUDJRN)
- Output in Excel with the capability of e-mailing the report directly to users
- Reports can be grouped and scheduled in accordance with site requirements
- User-friendly GUI and easy report definition procedure

"With Compliance Evaluator, we've take a giant step forward toward our mission of making System i security easily attainable for managers and auditors," said Shmuel Zailer, CEO, Raz-Lee Security. "The clear, single-view display of complex, comprehensive security data makes managers' tasks a lot easier, enabling them to quickly assess – and immediately improve - the security of their environment."

About Raz-Lee Security Inc. and iSecurity

Raz-Lee Security, headquartered in Nanuet, New York, is the leading security solution provider for IBM's System i (AS/400) computers. Drawing upon its 25 years of expertise in the System i Performance and Optimization market, the company designs, develops and markets a comprehensive suite of advanced security software solutions - iSecurity.

Cont.

Raz-Lee's iSecurity product suite is field-proven and has been successfully implemented in over 30 countries. iSecurity features three product sets: the Prevention pack, a complete security solution covering user/password management, anti-virus protection, detection of harmful events, protection of workstations and more; the Compliance pack, which comprises auditing and compliance solutions, providing automatic reporting security related information; and the Application Security suite, which provides information on all changes in business-critical data using real-time alerts and timeline reports.
