

## iSecurity Featured in the IBM i Essentials Virtual Conference

**Herzliya, Israel** – March 9, 2010 – [Raz-Lee Security](#), a leading supplier of information security solutions for IBM Power i servers (iSeries/AS/400) together with its North American business partner, [Software Engineering of America](#), will participate in the [IBM i Essentials Virtual Conference](#) held on March 9-10<sup>th</sup>.

This unique online event includes top-notch educational webcasts live from industry experts, exhibitor booths staffed with live team members holding online chats, and networking with industry peers. As many as 16 webcasts will be held, by Jeff Uehling from IBM, Mike Pavlak from Zend and others, covering all the information required for keeping up-to-date in the IBM i world. The show will be attended by many prominent players in the AS/400 security market.

**Visit us at the iSecurity booth by registering and accessing the show [at this link](#).**

At the show, Raz-Lee and SEA will showcase the iSecurity [Compliance Evaluator](#) solution, which enables managers to quickly check the compliance of their systems with industry and corporate policies using customizable user-friendly reports. In addition, Application Security, Authority on Demand, Native Object Security and User & System Value Replication solutions will be spotlighted.

"This virtual show extends the reach of a traditional conference, providing us with globe-spanning opportunities to show off our advanced technology," said Eli Spitz, VP Business Development, Raz-Lee Security. "I am confident that in such a venue, our advanced Power i security solutions will generate far-ranging awareness."

## About Raz-Lee Security Inc. and iSecurity

Raz-Lee Security, headquartered in Nanuet, New York, is the leading security solution provider for IBM's System i (AS/400) computers. Drawing upon its 25 years of expertise in the System i Performance and Optimization market, the company designs, develops and markets a comprehensive suite of advanced security software solutions - iSecurity.

Raz-Lee's iSecurity product suite is field-proven and has been successfully implemented in over 30 countries. iSecurity features three product sets: the Prevention pack, a complete security solution covering user/password management, anti-virus protection, detection of harmful events, protection of workstations and more; the Compliance pack, which comprises auditing and compliance solutions, providing automatic reporting security related information; and the Application Security suite, which provides information on all changes in business-critical data using real-time alerts and timeline reports.
