

## **Raz-Lee Security Launches New Corporate Website**

**Nanuet, New York – January 13, 2009** - Raz-Lee Security Inc., a major vendor of security solutions for IBM System i (iSeries or AS/400) servers, has launched a new corporate website at [www.razlee.com](http://www.razlee.com)

The new website was designed Raz-Lee's new look, matching the professional, high-end qualities of its iSecurity technology.

The website contains information on iSecurity products and technology, GUI, a market overview, customer quotes and partners and branches. It enables customers to easily download products and contact the relevant branches of Raz-Lee Security.

### **About Raz-Lee Security Inc. and iSecurity**

Raz-Lee Security, headquartered in Nanuet, New York, is the leading security solution provider for IBM's System i (AS/400) computers. Drawing upon its 25 years of expertise in the System i Performance and Optimization market, the company designs, develops and markets a comprehensive suite of advanced security software solutions - iSecurity.

Raz-Lee's iSecurity product suite is field-proven and has been successfully implemented in over 30 countries. iSecurity features three product sets: the Prevention pack, a complete security solution covering user/password management, anti-virus protection, detection of harmful events, protection of workstations and more; the Compliance pack, which comprises auditing and compliance solutions, providing automatic reporting security related information; and the Application Security suite, which provides information on all changes in business-critical data using real-time alerts and timeline reports.
