

**FOR IMMEDIATE RELEASE**

## **Raz-Lee Security Declares its Products V6R1-Ready**

**Nanuet, New York (April 1, 2008)** - Raz-Lee Security Inc., a leading vendor of security solutions for IBM System i computers, announced today that all products in both the iSecurity and Scope suites support the IBM V6R1 operating system.

Raz-Lee issued the compliance statement following the conversion and testing of its products at the IBM Innovation Center for Business Partners in Waltham, Massachusetts. The company's customers can easily download software updates from the company's website.

V6R1 is the new operating system for System i IBM computers, featuring improved capabilities in areas of security, Web services, and virtualization, among others.

"As leaders in the Security software market, we make it a point to always stay on top of the latest technologies," said Mr. Shmuel Zailer, CEO, Raz-Lee Security. "Not only are we compliant with the most up-to-date standards and operating systems, but we also incorporate the most advanced security tools in our products."

## **About Raz-Lee Security Inc.**

Raz-Lee Security, headquartered in Nanuet, New York, is the leading security solution provider for IBM's System i (AS/400) computers. Drawing upon its 25 years of expertise in the System i Performance and Optimization market, the company designs, develops and markets a comprehensive suite of advanced security software solutions - iSecurity.

Raz-Lee's iSecurity product suite is field-proven and has been successfully implemented in over 30 countries. iSecurity features three product sets: the Prevention pack, a complete security solution covering user/password management, anti-virus protection, detection of harmful events, protection of workstations and more; the Compliance pack, which comprises auditing and compliance solutions, providing automatic reporting security related information; and the Application Security suite, provide information on all changes in the business-critical data using real-time alerts and timeline reports.
