

## Key Features

- > Monitors user activities and object access in real-time
- > Triggers alert messages and corrective actions using **iSecurity Action**
- > Simple to use – no technical knowledge required
- > More than 200 predefined queries and reports
- > Query Wizard – creates queries quickly and easily without programming
- > Time groups apply rules and filters at predefined times
- > “Backward Glance” feature – quickly look at what happened to your system in the last few minutes
- > View multiple audit types with one query
- > Sort query data in any order
- > Design custom output for query data – select and sort data fields
- > Report Scheduler – automatically run reports at specified times
- > Explains parameters and data values with a single keystroke
- > **Audit Scheduler** – change audit scope automatically at designated times

## Benefits

- > Specially designed for non-technical users such as auditors, managers and administrators
- > Enables compliance with Sarbanes-Oxley (SOX), PCI, HIPAA, and site and auditor-defined regulations
- > Minimizes throughput delay and resource usage
- > Simple, intuitive audit parameter definition process
- > Full text explanations of audit types, fields, field values and other data make parameter definition easy and error-free
- > Scheduler feature minimizes performance impact during peak periods
- > Powerful query and report generator provides the data you need when you need it, without tying up IT resources
- > Integrates with **iSecurity Visualizer** to produce rich graphical presentations of audit data
- > Integrates with **iSecurity Central Admin** to support single-console reporting in multi-LPAR environments
- > Superior human engineering ensures security implementation quickly, efficiently and without requiring expensive security consultants
